AMENDMENT TO THE SPECIFICATION

Please replace paragraph [0018] with the following paragraph:

[0018] To illustrate operation within the switch matrix of FIG 4., one switch, S6', is shown as closed. When Row_1 is driven low by a processor 20 coupled to the current sensing circuit, current flows through R6 and R18, as well as the base to emitter junction of Q2, which is the forward current path indicated by the arrow of Q2, as is well appreciated by those skilled in the art. Note that since only Row_1 is driven low, only the switches on Row_1 (S5', S6', S7', or S8'S1', S2', S3', or S'4) can switch on the transistors Q1 through Q4.
